U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Pap r No.

Application/Control Number: 09/883,995 Page 2

Art Unit: 1102

Claims 2, 3 are rejected under 35 U.S.C. 102(a) as being anticipated by admitted prior art.

Applicant's claims are considered to be met by the device shown in instant figures 10-12, as discused in the previous Office action.

Applican argues that the anode cartridge is recited to be for electroplating. It is well-known in the art that while a cathode cartridge carries a plated base with a part to be plated, the anode cartridge "may not" include the plated base.

It is unclear if applicant uses "may" in the sense of permission or in the sense of maybe. Either way, his argument is totally non-persuasive.

First, an object to be coated or plated (plated base) is not always the cathode. For instance, to provide an oxide coating on an aluminum base involves making the aluminum base the anode in a process known as "anodizing". See Wehrmann 3,824,159 (example 1 in column 5) in this regard. This document is cited here as an explanation reference, and is not used as an anticipatory reference.

Second, there is absolutely nothing in applicant's claim language that excludes the presence of a plated base.

Thus, the terms "anode cartridge" and "anode conductor" are expressions of intended use and do not structurally distinguish over the device shown in figures 10-12.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/883,995 Page 3

Art Unit: 1102

Claim 1, line 13, "said cathode conductor....are retained" is deemed to be misdescriptive in that while the rear wall insulator 6 appears to retain the first elastin thin board 3 and the plated base 2, it does not retain the cathode conductor 5.

Claim 1, line 19, "is" should be --being--.

Claim 1, line 20, "has" should be --having--.

This rejection is prompted by applicant's June 27, 2003 response amending claim 1.

Claim 1 would be allowable upon overcoming the 35 USC 112 rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The examiner can be reached at 703-308-3329. His supervisor Nam Nguyen can be reached at 703-308-3322. Any general inquiry should be directed to the receptionist at 703-308-0661. A fax number for TC 1700 is 703-872-9311.
